

SciFinder Training Webinar

Thursday, 15.05.2025 at 10:00 – 12:00

For advanced students, PhD students and scientists

Welcome to your **SciFinder Training**,

If you already use SciFinder and like to master the art or if you just found that Google does not cover it all- welcome to our two-lecture class.

Session 1: Why and how SciFinder is different (<https://american-chemical-society.zoom.com/meeting/register/BYANoKDRQMighKXlckhsgQ>)

Text searching:

- how CAS indexing is done; the breadth of what is covered
- the CAS lexicon your window into the intellectually assigned index
- best practice text searching + set up alerts to stay informed
- how patents lose their masks

special substance searching:

- molecules
- nanomaterials
- energy storage

Session 2: Advanced SciFinder Functionalities – get to the core fast! (<https://american-chemical-society.zoom.com/meeting/register/r1WTPug-TTApvI5Ylo6orA>)

CAS Indexing:

- to limit the cited and citing references to the relevant ones
- Knowledge Graph to see data connections fast

Advanced Functionalities:

- Cooperation in joined SciFinder Projects with defined participants roles
- Retrosynthesis

To get ready for the training please download the latest [SciFinder Quick Reference guide](#)

Your CAS Trainer Team is looking forward to meet you online!

Please register for **Session 1** or **Session 2** via the link.
